Hard drives crash. Viruses attack. Hurricanes happen. Important documents get lost. Information gets stolen. Frightening news for any covered entity.

Chances are you still have a lot of important patient information stored in your computer and all over your medical office. This information is vulnerable to natural disasters and other accidents which can erase everything in an instant and put you in serious risk of fines, lawsuits and even jail in some cases.

DocuSafe is a simple, safe and affordable line of online backup and recovery solutions that help you protect your patients' information to comply with HIPAA privacy and security rules. Get peace of mind by having information management experience and leading technology on your side.

Did you know that criminal sanctions for misuse or disclosures of PHI carry fines of \$50,000 to \$250,000 and one to ten years imprisonment?

Make Your World a Safer Place

How It Works

- 1. Open an account and select a plan.**
Open a DocuSafe user account which will allow you to select a plan and download MozyPro software. It's quick, easy and our step-by-step instructions will guide you through the process.

- 2. Download and install software.**
MozyPro downloads in just seconds, and the installation is simple and fast.

- 3. Select files to be backed up.**
Simply check the boxes next to the backup sets, or types of files you want to back up, and MozyPro does the rest. In addition to selecting files by backup sets, you also have the option of selecting specific files and directories.

Five plans you can combine and bundle with other useful Business Services – paper to digital scanning, consulting, and managed storage.

Do you prefer a full service backup solution? Learn more about our Outsourcing Services info@avanxis.com

FORTUNE
SMALL BUSINESS

"MozyPro is fast, simple, and relatively cheap. It gives you another layer of protection in the event of disaster. There is no reason not to use it."

TECHNOLOGY ADVICE YOU CAN TRUST

PC WORLD

"Online backup services such as MozyPro help businesses recover data after disaster strikes."

InformationWeek

"Of all the solutions tested here, MozyPro was probably the best of the bunch—easiest to work with, least intrusive, and most versatile."

"It's something businesses have done for years - backing up their data to remote locations over the internet. Now you can do the same thing."
